LINKEDIN QUESTION GRID

FOLLOW THE COMPANIES/PERSONS		
Students follow at least 3 companies and 3 persons with explanation	/10	Three companies that I have followed are Mango Byte, Vtech, and NTT DATA Services. Because three of these companies are the IT companies in Cambodia I can get the information about hiring jobs that I can apply to their company in the future.
JOIN THE GROUP		
Students join at least 3 groups. Explain why they join those groups and what they gain from the group they join.	/10	Three groups that I have joined are HR Circle, HR Cambodia, and HR Professional Cambodia. The reason that I joined all of those three groups is because it gain me to get a lot of information about which company is hiring staff at the moment.
LEARNING COURSE		
Students explain the way they found free courses.	/10	The way I found the free course on LinkedIn is by joining a free course group.
Name the course(s) they are interested in with reasons.	/15	_ The course that I in interested in is Master Lambda Function with map() functions, and the reason is because Map in Python is a function that works as an iterator to return a result after applying a function to every item of an iterable. It is really helpful when you want to apply a single transformation function to all the iterable elements
FORMAT		
Font: Verdana 12 Length: 20 – 40 words for each question	/5
